## Plural Component, Impingement Mix Air Purge Spray Gun

For use with non-flammable foam and polyurea. For professional use only.

Not for use in explosive atmospheres.

**3500 psi (24.5 MPa, 245 bar) Maximum Fluid Working Pressure**

*80-130 psi (0.56-0.9 MPa, 5.6-9.0 bar) Air Inlet Pressure Range*

*200°F (94°C) Maximum Fluid Temperature*

**Important Safety Instructions**

Read all warnings and instructions in this manual.

# Manual Conventions

## Warning

 **WARNING**

A warning alerts you to possible serious injury or death if you do not follow instructions.

Symbols, such as fluid injection (shown), alert you to a specific hazard and direct you to read the indicated hazard warnings on pages 7-8.

## Caution

**CAUTION**

A caution alerts you to possible equipment damage or destruction if you do not follow instructions.

## Note

 A note indicates additional helpful information.

# List of Models/Mix Chamber Selection Guide

## Round Pattern Guns

Gun Part No., Series	Mix Chamber			
	Part No.	Impingement Port Size in. (mm)	Equivalent Size	Seal Material

## Flat Pattern Guns, continued

## Flat Pattern Stud Wall Gun

See manual number 311071 for more information.

Gun Part No., Series	Mix Chamber			Flat Tip			Flow Data
	Part No.	Impingement Port Size in. (mm)	Equivalent Size	Part No.	Pattern Dia. at 24 in. (610 mm) to Target in. (mm)	Orifice Size in. (mm)	Approximate Flow Rate at 1000 psi (7.0 MPa, 70 bar)
249525	AF4242	.042 (1.00)	-01	FTM979	22 (559)	.038 (0.97)	11 lb/min (4.99 kg/min)
249526	AF5252	.052 (1.30)	-02	FTM979	22 (559)	.038 (0.97)	15 lb/min (6.81 kg.min)

## Spatter Pattern Gun

Gun Part No., Series	Mix Chamber		
	Part No.	Impingement Port Size in. (mm)	Equivalent Size
248408 A	AR7070	.070 (1.75)	-04

## Wide Round Pattern Gun

Gun Part No., Series	Mix Chamber			Pattern Diameter at 24 in. (610 mm) to Target in. (mm)	Equivalent Flow to Mix Chamber Size Reference Part No.
	Part No.	Impingement Port Size in. (mm)	Equivalent Size		
249529	AW3939	.039 (0.99)	-01	16 (406.4)	AR4242
249530	AW4646	.046 (1.17)	-02	18 (457.2)	AR5252

## Four-Hose Gun

### Wide Round Pattern Gun with Four-Hose Recirculating Gun Manifold

Gun Part No., Series	Mix Chamber			Pattern Diameter at 24 in. (610 mm) to Target in. (mm)	Approximate Flow Rate at 1000 psi (7.0 MPa, 70 bar)
	Part No.	Impingement Port Size in. (mm)	Equivalent Size		
249810	AW2222	.022 (0.56)	NA	8-9 (203-229)	4.5 lb/min (204 kg/min)

## Non 1:1 Ratio Guns

Gun Part No., Series	Mix Chamber
253888	AR2232

 <b>WARNING</b>	
	<p><b>PERSONAL PROTECTIVE EQUIPMENT</b></p> <p>You must wear proper protective equipment when operating, servicing, or when in the operating area of the equipment to help protect you from serious injury, including eye injury, inhalation of toxic fumes, burns, and hearing loss. This equipment includes but is not limited to:</p> <ul style="list-style-type: none"> <li>• Protective eyewear</li> <li>• Clothing and respirator as recommended by the fluid and solvent manufacturer</li> <li>• Gloves</li> <li>• Hearing protection.</li> </ul>
	<p><b>TOXIC FLUID OR FUMES HAZARD</b></p> <p>Toxic fluids or fumes can cause serious injury or death if splashed in the eyes or on skin, inhaled, or swallowed.</p> <ul style="list-style-type: none"> <li>• Read Material Safety Data Sheet (MSDS) to know the specific hazards of the fluids you are using.</li> <li>• Store hazardous fluid in approved containers, and dispose of it according to applicable guidelines.</li> </ul>
	<p><b>SKIN INJECTION HAZARD</b></p> <p>High-pressure fluid from gun, hose leaks, or ruptured components will pierce skin. This may look like just a cut, but it is a serious injury that can result in amputation. <b>Get immediate surgical treatment.</b></p> <ul style="list-style-type: none"> <li>• Do not point the gun at anyone or at any part of the body.</li> <li>• Do not put your hand or fingers over the gun fluid nozzle.</li> <li>• Do not stop or deflect leaks with your hand, body, glove, or rag.</li> <li>• Do not “blow back” fluid; this is not an air spray system.</li> <li>• Follow <b>Pressure Relief Procedure</b>, page 15, when you stop spraying and before cleaning, checking, or servicing equipment.</li> <li>• Use lowest possible pressure when flushing, priming, or troubleshooting.</li> <li>• Engage piston safety lock when not spraying.</li> <li>• Tighten all fluid connections before operating the equipment.</li> <li>• Check hoses, tubes, and couplings daily. Replace worn or damaged parts immediately. High pressure hose cannot be recoupled; replace the entire hose.</li> </ul>
	<p><b>BURN HAZARD</b></p> <p>Equipment surfaces and fluid that’s heated can become very hot during operation. To avoid severe burns, do not touch hot fluid or equipment. Wait until equipment/fluid has cooled completely.</p>

**WARNING**
**FIRE AND EXPLOSION HAZARD**

Flammable fumes, such as solvent and paint fumes, in work area can ignite or explode. To help prevent fire and explosion:

- Use equipment only in well ventilated area.
- Eliminate all ignition sources, such as pilot lights, cigarettes, portable electric lamps, and plastic drop cloths (potential static arc).
- Do not plug or unplug power cords or turn lights on or off when flammable fumes are present.
- Keep the work area free of debris, including solvent, rags, and gasoline.
- Ground equipment and conductive objects. See **Grounding**, page 10.
- Hold gun firmly to side of grounded pail when triggering into pail.
- Use only grounded hoses.
- If there is static sparking or you feel a shock, **stop operation immediately**. Do not use equipment until you identify and correct the problem.

**EQUIPMENT MISUSE HAZARD**

Misuse can cause serious injury or death.

- For professional use only.
- Use equipment only for its intended purpose. Call your Graco distributor for information.
- Read manuals, warnings, tags, and labels before operating equipment. Follow instructions.
- Check equipment daily. Repair or replace worn or damaged parts immediately.
- Do not alter or modify equipment. Use only Graco parts and accessories.
- Do not exceed the maximum working pressure or temperature rating of the lowest rated system component. See **Technical Data** in all equipment manuals.
- Use fluids and solvents that are compatible with equipment wetted parts. See **Technical Data** in all equipment manuals. Read fluid and solvent manufacturer's warnings.
- Route hoses and cables away from traffic areas, sharp edges, moving parts, and hot surfaces.
- Do not use hoses to pull equipment.
- Comply with all applicable safety regulations.

**PRESSURIZED ALUMINUM PARTS HAZARD**

Do not use 1,1,1-trichloroethane, methylene chloride, other halogenated hydrocarbon solvents or fluids containing such solvents in pressurized aluminum equipment. Such use can cause serious chemical reaction and equipment rupture, and result in death, serious injury, and property damage.

# Overall View

TI2408A

## Key:

- A A Side Fluid Valve (ISO)
- B B Side Fluid Valve (RESIN)
- C Air Cap
- D Air Line Quick Coupler

- V Gun Air Whip Hose
- W Air Valve

# Isocyanate Hazard

--	--	--	--	--	--	--

Spraying materials containing isocyanates creates potentially harmful mists, vapors, and atomized particulates.

Read material manufacturer's warnings and material MSDS to know specific hazards and precautions related to isocyanates.

Prevent inhalation of isocyanate mists, vapors, and atomized particulates by providing sufficient ventilation in the work area. If sufficient ventilation is not available, a supplied-air respirator is required for everyone in the work area.

To prevent contact with isocyanates, appropriate personal protective equipment, including chemically impermeable gloves, boots, aprons, and goggles, is also required for everyone in the work area.

# Keep A and B Components Separate

<b>CAUTION</b>
To prevent cross-contamination of the gun's wetted parts, do not interchange A component (isocyanate) and B component (resin) parts. The gun is shipped with the A side on the left. The fluid manifold, fluid housing, side seal cartridge, check valve cartridge, and mix chamber are marked on the A side.

# Grounding

	<b>WARNING</b>		
Read warnings, page 8.			

Check your local electrical code and proportioner manual for detailed grounding instructions.

Ground the spray gun through connection to a Graco-approved grounded fluid supply hose.

# Piston Safety Lock

Engage piston safety lock whenever you stop spraying, to avoid accidental triggering.

	<b>WARNING</b>
Read warnings, page 7.	

**To engage piston safety lock:** push knob in and turn clockwise. If engaged, gun will not actuate.

TI2409A

**To disengage piston safety lock:** push knob in and turn counterclockwise until it pops out. There will be a gap between knob and gun body.

TI2410A

# Turning Air Cap

**⚠ WARNING**

Read warnings, page 7.

1. Follow **Pressure Relief Procedure**, page 15.
2. Close fluid valves A and B before turning air cap (C).

T12421A

# Loss of Air Pressure

In event of loss of air pressure, gun will continue to spray. To shut off gun, do one of the following:

- Push in piston safety lock, see page 10.
- Close fluid valves A and B.

T12421A

# Setup

- 1.** Close fluid valves A and B.

TI2411A

- 2.** Connect A (ISO) and B (RESIN) fluid hoses to fluid manifold.

TI2417A

- 3.** Engage piston safety lock, page 10.

TI2409A

- 4.** Connect gun air whip hose (V) and air valve (W\*) to main air hose. Attach fluid manifold (M) to gun.

TI2554A

 To change position of fluid manifold or use optional fluid inlets, see pages 16 and 17.

- 5.** Connect quick coupler (D). Turn on air. Open air valve (W\*). Air should flow from nozzle (N).

TI2414-1A

 To use optional air inlet, see page 17.

- 6.** Disengage piston safety lock, page 10.

TI2410A

- 7.** Trigger gun to check for full mix chamber travel. Front of air cap (C) should be approximately flush with front retaining ring (U).

TI2414-1A

\* (W) Not included with spatter gun.

- 8.** Open cleanoff air valve (K) 1/4-1/2 turn and trigger gun to check that cleanoff air is flowing. Adjust as desired. This step does not apply with spatter spray gun 248408.

TI2413A

- 9.** Engage piston safety lock, page 10.

TI2409A

- 10.** Turn on proportioner.

- 11.** Open B (RESIN) fluid valve (about three half turns). Then open A (ISO) fluid valve.

TI2414A

- 12.** Disengage piston safety lock, page 10.

TI2410A

- 13.** Test spray onto cardboard. Adjust pressure and temperature to get desired results.

TI2645A

- 14.** Apply layer of lubricant over front of gun and lock ring, or use gun cover to prevent overspray buildup and ease disassembly. See page 43 to order lubricant and gun cover.

- 15.** Gun is ready to spray.

<b>CAUTION</b>
Air supply is required for gun actuation. Do not disconnect gun air supply until fluid pressure is relieved, page 15.

# Shutdown

For overnight shutdown:

**1.** Follow **Pressure Relief Procedure**, page 15.

**2.** Leave air turned on and gun detriggered.

 Grease gun daily to prevent 2 component curing and keep fluid passages clean. Purge air carries grease mist through air chamber (AC), impingement ports (IP), and out mix chamber nozzle (N), coating all surfaces. Use Graco 117773 Grease, see page 43.

**3.** Remove grease fitting cap. Using grease gun (Y), dispense grease into fitting (G) until grease mist sprays from mix chamber nozzle (N). Do not over-grease; use 2 shots maximum. Do not spray grease mist on sprayed material.

T12415A

**4.** Replace grease cap.

**5.** *Round and Flat pattern guns only:* Turn off air valve (W).  
*Spatter pattern gun only:* Shut down main air supply.

# Pressure Relief Procedure

**⚠ WARNING**

Read warnings, page 7. Relieve pressure before cleaning or repairing gun.

1. Engage piston safety lock, page 10.

TI2409A

**CAUTION**

Air supply is required for gun actuation. Do not disconnect gun air supply until fluid pressure is relieved.

2. Close fluid valves A and B. Leave air valve (W) open.

TI2421A

3. Disengage piston safety lock, page 10.

TI2410A

4. Trigger gun onto cardboard or into waste container to relieve pressure.

TI4722a

5. Engage piston safety lock, page 10.

TI2409A

**⚠ WARNING**

Fluid in the hose and proportioner is still under pressure. Follow the Pressure Relief Procedure in the proportioner manual.

To relieve pressure in the hose after the gun is removed, place the fluid manifold over containers, facing away from you. Very carefully open the fluid valves. Under high pressure, fluid will spray sideways from the fluid ports.

TI2484A

# Optional Configurations

## Optional Fluid Manifold Position

Fluid manifold is mounted to bottom of gun, with A side on left, viewed from operator's position at back of gun. If desired, manifold may be moved to top of gun. Doing this will reposition A side parts (fluid inlet swivel, check valve, side seal cartridge, and mix chamber) to right.

6. Attach fluid manifold. Connect air. Return gun to service.

CAUTION
To prevent cross-contamination of gun's wetted parts, do not interchange A component (isocyanate) and B component (resin) parts.

1. Follow **Pressure Relief Procedure**, page 15.
2. Disconnect air (D) and remove fluid manifold (M).

TI2554A

3. Remove **Front End**, page 27.
4. Rotate fluid housing 180°.
5. Attach **Front End**, page 28.

## Optional Hose Position

Fluid inlet swivels and air quick disconnect fitting point to rear. If desired, these positions can be changed so hoses travel downward.

### CAUTION

To prevent cross-contamination of gun's wetted parts, do not interchange A component (isocyanate) and B component (resin) parts.

1. Follow **Pressure Relief Procedure**, page 15. Also relieve system pressure, see proportioner manual.

2. Disconnect air (D) and remove fluid manifold (M).

3. Disconnect fluid hoses from inlet swivels (A, B). Remove swivels. Remove plugs from optional inlets (P).

4. Apply thread sealant to plugs (12c), elbows (50\*), and male threads of swivels (A, B). Install elbows (50\*) in optional inlets (P), facing down. Install swivels (A, B) in elbows. Be sure to install A swivel (smaller) in A side. Install plugs where swivels had been. Torque all parts to 235-245 in-lb (26.6-27.7 N•m).

 Elbows (50\*) are not included with spatter spray gun.

5. Connect A and B hoses to A and B swivels.

6. Remove fitting (D) and plug (J). Reverse positions. Apply thread sealant and torque to 125-135 in-lb (14-15 N•m).

7. Attach fluid manifold. Connect air. Return gun to service.

# Flat Spray Tips

**1.** Follow **Pressure Relief Procedure**, page 15.

**2.** Remove air cap (10) and flat spray tip (39). Inspect o-ring (40).

 If tip is stuck, pry off with small screwdriver or pull off with pliers. Tip is hardened to resist damage.

**3.** To clean, soak tip in compatible solvent, see page 20. Clean gently with tip cleanout tool 15D234, page 44, to fit tip configuration.

**4.** Reposition tip horizontally or vertically, or install different tip size.

 Tips marked on back with last 3 digits of part no. See **Flat Tip Part No. Reference Guide**, page 38.

**5.** Reinstall air cap hand tight. Cleaning hole alignment to tip not important.

# Maintenance

## Supplied Tool Kit

- Hex Nut Driver; 5/16
- Screwdriver; 1/8 blade
- Nozzle Drill Bit; various sizes depending on nozzle size. See TABLE 1, page 21.
- Impingement Port Drill Bit; various sizes depending on port size. See TABLE 3, page 22.

- 117661 Pin Vise; dual reversible chucks

- 551189 Grease Gun; with 3 oz grease
- 15B817 Flush Manifold  
Not included with spatter spray gun.

## Keep Gun Clean

Keep gun clean with accessory gun cover, page 40.

Applying a light coat of lubricant will make cleaning easier.

## As Needed

- 1. Clean Outside of Gun**, page 20.
- 2. Clean Mix Chamber Nozzle**, page 21, a minimum of once a day.
- 3. Clean Air Cap**, page 20.

- 4. Clean Muffler**, page 20.

- 5. Clean Fluid Manifold**, page 20.

- 6. Clean Passages**, page 21.

- 7. Clean Impingement Ports**, page 21.

## Daily

Follow **Shutdown**, page 14.

## Weekly to Monthly

- 1. Clean Mix Chamber and Side Seal Cartridges**, page 29. Check o-rings.
- 2. Clean Check Valves**, page 31. Check o-rings and filters.

## Flush Gun

If it is necessary to flush gun, use following procedure.

 <b>WARNING</b>   Read warnings, page 8.
---

1. Follow **Pressure Relief Procedure**, page 15.
2. Flush with compatible solvent into a grounded metal pail, holding a metal part of fluid manifold firmly to side of pail. Use the lowest possible fluid pressure when flushing.
3. Follow **Pressure Relief Procedure**, page 15.

 For a more thorough flush, Solvent Flush Kit 218669 is available as an accessory. The kit connects to Flush Manifold 15B817.

## Clean Outside of Gun

Wipe off outside of gun with compatible solvent.

Use N Methyl Pyrrolidone (NMP), Dynasolve CU-6, Dzol, or equivalent to soften cured material.

<b>CAUTION</b>
These solvents are not recommended for flushing.

## Clean Air Cap

Soak air cap in compatible solvent. Clean holes with #58 (.042) drill bit.

## Clean Muffler

Remove and clean muffler with compatible solvent.

## Clean Fluid Manifold

Clean fluid manifold sealing faces with compatible solvent and a brush whenever removed from gun. Be sure to clean the two fluid ports (X) in the top mating surface. Do not damage the flat sealing surfaces. Coat with grease if left exposed, to seal out moisture.

TI2411-1

## Clean Mix Chamber Nozzle

1. Engage piston safety lock, page 10.

TI2409A

2. Refer to TABLE 1. Also see identification chart under **Drill Bit Kits**, page 39. Use the appropriate size drill bit to clean mix chamber nozzle (N). If necessary, clean air cap (C) gently with stiff brush.

TI2418A

Table 1: Nozzle Drill Bit Sizes

Round Spray		Flat Spray	
Mix Chamber Part No.	Drill Size in. (mm)	Mix Chamber Part No.	Drill Size in. (mm)
AR2020	#58, .042 (1.00)	AF2020	3/32, .094 (2.35)
AR2929	#55, .052 (1.30)	AF2929	3/32, .094 (2.35)
AR3737	#55, .052 (1.30)		
AR4242	#53, .060 (1.50)	AF4242	3/32, .094 (2.35)
AR5252	#50, .070 (1.75)	AF5252	3/32, .094 (2.35)
AR6060	#44, .086 (2.15)		
AR7070	3/32, .094 (2.35)		
AR8686	#32, 0.116 (2.90)		

## Clean Passages

If necessary, clean out passages in fluid housing and handle with drill bits. Refer to TABLE 2 and to **Cutaway View** on page 26 for diameter and location of passages. All drill bits are available in an accessory kit. Order kit 248969 for Air Purge Handle Drill Kit, see page 40.

Table 2: Passage Diameters

Passage Description	Ref. Letter (page 26)	Diameter, in. (mm)
Optional Air Inlet	C	7/16, 1/8 (11.0, 3.1)
Purge Air	D	1/8 (3.1)
Piston Air	E, F	1/8 (3.1)
Air Exhaust	G	11/32, 1/8 (8.7, 3.1)
Air Valve Bore	H	9/32 (7.1)
Cleanoff Air	Not Shown	3/32 (2.35)
Check Valve Holes	Not Shown	3/32 (2.35)
Grease	Not Shown	3/32 (2.35)

## Clean Impingement Ports

1. Follow **Pressure Relief Procedure**, page 15.
2. Disconnect air (D) and remove fluid manifold (M).

TI2554A

3. **Flush Gun**, page 20. If gun will not flush, see page 29.
4. **Remove Front End**, page 27.

- 5.** Push mix chamber forward until impingement ports (IP) are visible. See TABLE 3 for appropriate size drill to clean ports. Also see identification chart under **Drill Bit Kits**, page 39. Some mix chambers have counterbored holes (CB) and require two drill sizes to clean impingement ports completely.

**Table 3: Impingement Port Drill Bit Sizes**

Mix Chamber Part No.	Impingement Port (IP) Drill Bit Size in. (mm)	Counterbore (CB) Drill Bit Size in. (mm)
AR2020	#76, .020 (0.50)	#53, .060 (1.50)
AR2929	#69, .029 (0.70)	#53, .060 (1.50)
AR3737	#63, .037 (0.94)	N/A
AR4242	#58, .042 (1.00)	N/A
AR5252	#55, .052 (1.30)	N/A
AR6060	#53, .060 (1.50)	N/A
AR7070	#50, .070 (1.75)	N/A
AR8686	#44, .086 (2.15)	N/A
AF2020	#76, .020 (0.50)	#53, .060 (1.50)
AF2929	#69, .029 (0.70)	#53, .060 (1.50)
AF4242	#58, .042 (1.00)	N/A
AF5252	#55, .052 (1.30)	N/A

- 6.** Push mix chamber back in position.
- 7.** **Attach Front End**, page 28.
- 8.** Attach fluid manifold. Connect air. Return gun to service.

# Troubleshooting

**1.** Follow **Pressure Relief Procedure**, page 15, before checking or repairing gun.

**2.** Check all possible problems and causes before disassembling gun.

<b>CAUTION</b>
To prevent cross-contamination of the gun's wetted parts, do not interchange A component (isocyanate) and B component (resin) parts.

<b>PROBLEM</b>	<b>CAUSE</b>	<b>SOLUTION</b>
Gun does not fully actuate when triggered.	Safety lock engaged.	Disengage safety lock, page 10.
	Plugged muffler (22).	Clean, page 20.
	Damaged air valve o-rings (24).	Replace, page 33.
Fluid does not spray when gun is fully actuated.	Closed fluid valves (12b).	Open.
	Plugged impingement ports.	Clean, page 21.
	Plugged check valves (26).	Clean, page 31.
Gun actuates slowly.	Plugged muffler (22).	Clean, page 20.
	Damaged piston o-rings (16, 17).	Replace, page 32.
	Dirty air valve, or damaged o-rings (24).	Clean air valve or replace o-rings, page 33.
Gun delays, then actuates abruptly.	Cured material around side seals (18).	Inspect side seals (18c) and mix chamber (19) for scratches. Replace, page 29.
	Retaining ring (9) not bottomed out.	Tighten retaining ring until bottomed out.
Loss of round pattern.	Dirty mix chamber nozzle.	Clean, page 21.
Loss of flat pattern.	Plugged spray tip.	Clean in compatible solvent, page 18.
	Worn tip.	Replace, page 18.
	Dirty mix chamber nozzle.	Clean, page 21.
Leakage between flat tip and mix chamber.	Tip not seated properly.	Reassemble, page 18.
	Damaged/missing o-ring (40).	Replace, page 18.
Pressure imbalance.	Plugged impingement ports.	Clean, page 21.
	Plugged check valves (26).	Clean, page 31.
	Viscosities not equal.	Adjust temperature to compensate.

<b>PROBLEM</b>	<b>CAUSE</b>	<b>SOLUTION</b>
A and/or B fluid in gun air section.	Damaged side seals (18c).	Replace, page 29.
	Damaged mix chamber (19).	Replace, page 29.
	Damaged side seal o-rings (18d, 18e).	Replace, page 29.
	Tightened air cap with fluid valves (12b) open.	Close valves first.
Fluid mist from mix chamber or air cap.	Damaged side seals (18c).	Replace, page 29.
	Damaged side seal o-rings (18d, 18e).	Replace, page 29.
	Damaged mix chamber (19).	Replace, page 29.
Excessive overspray.	Too much cleanoff air.	Reduce, page 13.
Rapid buildup of material on air cap.	Plugged air cap holes.	Clean, page 20.
	Too little cleanoff air.	Increase, page 13.
	Damaged/missing fluid housing o-ring (23).	Replace, page 29.
	Damaged front o-ring (3).	Replace, page 29.
Reduced cleanoff air.	Damaged front o-ring (3).	Replace, page 29.
Excessive cleanoff air when fluid valves are closed and gun is triggered.	Damaged/missing fluid housing o-ring (23).	Replace, page 29.
Fluid does not shut off when fluid valves are closed.	Damaged fluid valves (12b).	Replace.
Burst of air from muffler when gun is triggered.	Normal.	No action required.
Steady air leakage from muffler.	Damaged air valve o-rings (24).	Replace, page 33.
	Damaged piston o-rings (16, 17).	Replace, page 32.
Air leakage from front air valve.	Damaged air valve o-rings (24).	Replace, page 33.
Air leak around lock ring.	Damaged o-ring (21).	Replace, page 29.
Cannot tighten retaining ring (9) until it bottoms out.	Air cap (10) assembled before retaining ring (9).	Install retaining ring (9) first, then air cap (10), page 30.

# Theory of Operation

## Gun Triggered (Fluid Spraying)

Mix chamber (19) moves back, shutting off purge air flow. Impingement ports (IP) align with fluid ports of side seals (18c), allowing fluid to flow through mix chamber nozzle (N).

See page 13 to adjust cleanoff air valve (K).

 Flow paths are not shown to scale, for clarity.

 Flow paths are not shown to scale, for clarity.

## Gun Detriggered (Air Purging)

Mix chamber (19) moves forward, shutting off fluid flow. Impingement ports (IP) open to air chamber (AC), allowing purge air to flow through mix chamber nozzle (N).

See page 14 for use of grease fitting (G).

# Cutaway View

# Repair

## Tools Required

Tools needed for complete gun repair:

- adjustable wrench
- flat head screwdriver (included)
- 1/8 in. (3 mm) diameter rod
- 5/16 hex nut driver (included)

## Lubrication

Liberalily lubricate all o-rings, seals, and threads. Lubricate threads and outside of lock ring (11). See page 43 to order lubricant.

## Remove Front End

### ⚠ WARNING

Read warnings, page 7. Proper attachment of front end is critical. Do not operate gun if front end is loose or lock ring is not snug against handle.

1. Follow **Pressure Relief Procedure**, page 15.
2. **Flush Gun**, page 20.

### CAUTION

If lock ring (R) is stuck due to material buildup, do not force it by turning entire front end. Locating tabs (Z) may break off. Soak front of gun in solvent to soften cured material and free lock ring.

3. Unscrew lock ring (R) until front end of gun is loose. Turn fluid housing (F) 1/8 turn counterclockwise. Unscrew lock ring completely and remove front end of gun.

T12416A

## Attach Front End

**WARNING**

Read warnings, page 7. Proper attachment of front end is critical. Do not operate gun if front end is loose or lock ring is not snug against handle.

1. Engage piston safety lock, page 10.

TI2409A

2. Push on air cap (C) until it is flush with front of gun. This ensures that mix chamber is all the way back.

TI2422A

3. Check that o-ring (21) is in position. Liberally lubricate o-ring, threads of lock ring (R) and handle (H), and outside of lock ring. Orient front end (F) as required for desired fluid manifold mounting (bottom mounting is shown). Insert keyed end (W) of mix chamber in socket (X). Screw lock ring onto handle as far as possible by hand.

TI2416A

4. Turn fluid housing 1/8 turn clockwise to engage slots (Y) and tabs (Z). Push on front end to ensure it is properly seated. Continue screwing lock ring (R) onto handle (H) very securely. When properly assembled, lock ring is snug against handle.

TI2423A

# Mix Chamber and Side Seal Cartridges

See page 3 for available mix chamber sizes.

**1.** Follow **Pressure Relief Procedure**, page 15.

**2.** Remove fluid manifold (M). Leave air connected.

TI2543A

**3.** Flush gun to remove residual A and B components, page 20. Follow **Pressure Relief Procedure**, page 15.

**4.** Disconnect air.

TI2540A

**5.** Remove **Front End**, page 27.

**6.** Remove air cap (10) and retaining ring (9). Inspect o-ring (3) inside retaining ring.

TI2424A

### CAUTION

To prevent cross-contamination of side seal cartridges, do not interchange A component and B component parts. The A component cartridge is marked with an A.

**7.** Pull out side seal cartridges (18). Also inspect o-ring (24) on cleanoff air valve (8).

TI2426A

*Continued on page 30.*

- 8.** Pull mix chamber (19) out rear of fluid housing. Inspect for damage and clean ports, page 21. Inspect o-ring (23) in front of fluid housing.

<b>CAUTION</b>
To prevent cross-contamination of the gun's wetted parts, mix chamber is marked with an A and a notch (N) on back edge. Be sure the A side of mix chamber is on the A side of gun.

- 9.** Apply thin coat of lubricant to mix chamber (19). Install mix chamber. Etched **A** and notch (N) must be on same side as **A** on fluid housing. Mix chamber is keyed to fit in fluid housing.

<b>CAUTION</b>
To prevent cross-contamination of side seal cartridges, do not interchange A component and B component parts. The A component cartridge is marked with an A.

- 10.** Carefully inspect side seal cartridge o-rings and surfaces. Replace worn or damaged parts. Liberally lubricate o-rings (18d, 18e) and reassemble. Press on side seal (18c) to check proper spring (18b) operation.

- 11.** Liberally lubricate and reinstall side seal cartridges (18).

- 12.** Lubricate all threads and reinstall retaining ring (9). Install air cap (10).

- 13.** Attach Front End, page 28.

- 14.** Connect air, and trigger the gun a few times to check for leaks. If either check valve pops out of its seated position, there is a poor fluid seal on that side of the mix chamber or side seal/cartridge components. Correct the problem before attaching the fluid manifold.

- 15.** Attach fluid manifold. Connect air. Return gun to service.

# Check Valves

 Before disassembling, press on ball (26c) to test check valve for proper movement and spring action.

**1.** Follow **Pressure Relief Procedure**, page 15.

**2.** Remove fluid manifold (M). Leave air connected.  
**Clean Fluid Manifold**, page 20.

T12543A

**3.** Flush gun to remove residual A and B components, page 20. Follow **Pressure Relief Procedure**, page 15.

**4.** Disconnect air.

T12540A

**5.** Pry out check valves (26) at notch.

 **WARNING**

Read warnings, page 7. Damaged check valve o-rings (26f, 26g) may result in external leakage. Replace o-rings if any damage is seen.

**6.** Slide filter (26d) off. Clean and inspect parts. Thoroughly inspect o-rings (26f, 26g). If necessary, remove screw (26b) and disassemble entire check valve.

T12429A

**7.** Reassemble check valves. Screw (26b) should be flush (within 1/16 in. or 1.5 mm) of housing (26a) surface. Liberally lubricate o-rings (26f, 26g) and carefully reinstall in fluid housing.

**8.** Attach fluid manifold. Connect air. Return gun to service.

**CAUTION**

To prevent cross-contamination of the check valves, do not interchange A component and B component parts. The A component check valve is marked with an A.

# Piston

**1.** Follow **Pressure Relief Procedure**, page 15.

**2.** Disconnect air (D) and remove fluid manifold (M).

TI2554A

**3.** Remove **Front End**, page 27.

**4.** Unscrew cylinder cap (5) and inspect o-ring (14).

TI2430A

**5.** Push piston shaft to remove piston (15). Inspect piston o-ring (16) and shaft o-ring (17).

TI2431A

**6.** Liberally lubricate piston o-rings. Reinstall piston. Shaft is keyed for proper assembly. Push firmly to seat piston.

TI2432A

**7.** Install cylinder cap (5).

TI2430A

**8.** Attach **Front End**, page 28.

**9.** Attach fluid manifold. Connect air. Return gun to service.

## Piston Safety Lock

1. Follow **Pressure Relief Procedure**, page 15.
2. Disconnect air (D) and remove fluid manifold (M).

TI2554A

3. Unscrew cylinder cap (5). Hold piston stop (28) with wrench and unscrew from safety lock (4). Inspect spring (30) and o-rings (14, 24).

TI2433A

4. Liberally lubricate o-rings and reassemble. Clean threads with solvent or alcohol. Apply medium-strength Loctite® or equivalent to threads on stop (28) and reassemble.
5. Attach fluid manifold. Connect air. Return gun to service.

## Air Valve

1. Follow **Pressure Relief Procedure**, page 15.
2. Disconnect air (D) and remove fluid manifold (M).

TI2554A

3. Unscrew air valve plug (2) and remove spring (31). Using a small diameter tool, push spool (32) out from front. Inspect o-rings (24).

TI2434A

4. Liberally lubricate o-rings and reassemble. Torque plug (2) to 125-135 in-lb (14-15 N•m).
5. Attach fluid manifold. Connect air. Return gun to service.

# Parts

**Round Pattern Gun Shown; see page 36 for additional parts and detail views**

- △1 Torque to 125-135 in-lb (14-15 N•m).
- △2 Torque to 20-30 in-lb (2.3-3.4 N•m).
- △3 Torque to 235-245 in-lb (26.6-27.7 N•m).
- △4 Torque to 35-45 in-lb (4-5 N•m).
- △5 Torque to 32-40 ft-lb (43-54 N•m).

AF2929	246360	0.094	3/32 (2.35)	0.029	#69 (0.70)	0.060	#53 (1.50)
AF4242	246360	0.094	3/32 (2.35)	0.042	#58 (1.00)	N/A	N/A
AF5252	246360	0.094	3/32 (2.35)	0.052	#55 (1.30)	N/A	N/A

† Available only in flat mix chamber kits or in 246360 multi-pack kit.

## Mix Chamber Part No. Reference Guide

Sample part no. AR4242:

AR	42	42
AR=Air purge round pattern	A orifice size (.042 in.)	B orifice size (.042 in.)
AF=Air purge flat pattern		

## Flat Tip Kits

Ref. No. 39, Flat Spray Tip	Pattern Size, in. (mm)
FT0424	low flow, 8-10 (203-254)
FT0438	medium flow, 8-10 (203-254)
FT0624	low flow, 12-14 (305-356)
FT0638	medium flow, 12-14 (305-356)
FT0838	medium flow, 16-18 (406-457)
FT0848	high flow, 16-18 (406-457)

### Flat Tip Part No. Reference Guide

Sample part no. FT0848:

FT	08	48
FT=Flat tip	x2=pattern length (8x2=16 in.)	Equivalent orifice diameter size (.048 in.)

## Gun Repair Kits

Read the chart left to right and top to bottom to find the quantity of each part in the kits.

Ref. No.	Bulk O-ring Kits, (qty)	246347 Side Seal Cartridge O-ring Kit	246348 Side Seal Kit	246351 Check Valve O-ring Kit	246355 Complete O-ring Kit
3	248137 (6)				1
14	248136 (6)				1
16	248135 (6)				1
17	248134 (6)				1
18c			2		
18d	248130 (6)	4			4
18e	248128 (6)	2	2		2
21	248132 (6)				1
23	248131 (6)				1
24	246354 (6)				5
26f	248133 (6)			2	2
26g	248129 (6)			2	2
40	246360 (3)				

## Check Valve Filter Screen Kits

Kits include 10 filter screens.

80 mesh filter screen is standard with gun.

**246357 40 mesh (.015 in., 375 micron)**

**246358 60 mesh (.010 in., 238 micron)**

**246359 80 mesh (.007 in., 175 micron)**

# Drill Bit Kits

For cleaning gun ports and orifices. Illustrations are actual size, for comparison.

Not all sizes are used with your gun.

Kit Part No.	Qty in Kit	Drill Bit Size			Illustration
		nominal	in.	mm	
249115	6	1/8	.125	3.18	
246623	3	#32	0.116	2.90	
246810	3	7/64	0.109	2.77	
246813	3	#39	.099	2.51	
246624	3	3/32	.094	2.39

## Drill Bit Kit

### 119386

Kit includes 20 cleanout drill bits ranging in sizes of #61 through #80.

## Air Purge Handle Cleanout Drill Kit

### 248969

Kit includes all 5 drill bits of extra long length needed to clean out the air passages in the Air Purge gun handle and fluid housing. See **Clean Passages**, page 21.

# Accessories

## Wide Pattern Mix Chamber Kits

Kits include mix chamber and cleanout drills. To spray larger diameter patterns than the standard mix chambers.

Kit Part No.	Pattern Diameter at 24 in. (609.6 mm) to target in (mm)	Equivalent flow to mix chamber size	Nozzle Drill Bit Size in (mm) *	Impingement Drill Bit Size in. (mm) *
AW2222	8 (203.2)	NA	.047 (1.20)	#74, .022 (0.56)
AW2828	15 (381.0)	Ref. AR2929	1/16, .062 (1.59)	#70, .028 (0.71)
AW3333	15 (381.0)	Ref. AR3737	#53, .060 (1.52)	#66, .033 (0.84)
AW3939	16 (406.4)	Ref. AR4242	#50, .070 (1.78)	#61, .039 (0.99)
AW4646	18 (457.2)	Ref. AR5252	.085 (2.15)	#56, .046 (1.17)
AW5757	18 (457.2)	Ref. AR6060	#42, .089 (2.26)	1.45 mm, .057 (1.45)
AW6464	22 (563.9)	Ref. AR7070	7/64, .109 (2.77)	#52, .064 (1.63)
AW8282	24 (609.6)	Ref. AR8686	1/8, .125 (3.18)	#45, .082 (2.08)

## Stainless Steel Side Seal Kits

Kits include a packing o-ring for each stainless steel seal.

Kit Part No.	Description	No. of Seals Per Kit
246348	SEAL KIT, SST	2
277299	SEAL KIT, SST	50

## Polycarbally Side Seal Kits

Kits include a packing o-ring for each polycarbally seal. The optional high wear, non-metallic polycarbally seals are for alternate fluids.

Kit Part No.	Description	No. of Seals Per Kit
249990	SEAL KIT, Polycarbally	2
277298	SEAL KIT, Polycarbally	50

## Extension Tip Kits

Kits include extension, flat tip seal and round tip seal, cleanout drill bit, and instructions.

Requires 248020 Extension Tip Air Cap Kit (order separately).

Kit Part No.	Hole Diameter x Length, in. (mm)	Recommended Mix Chambers	Spray Distance, ft (m) *	Pattern Diameter, in. (mm) *
248010	.042 x 0.50 (1.06 x 12.7)	AR2020/AF2929	15 (4.57)	10 (254)
248011	.052 x 0.50 (1.32 x 12.7)	AR2929/AF2929	12 (3.66)	10 (254)
248012	.060 x 0.50 (1.52 x 12.7)	AR4242/AF4242	12 (3.66)	12 (305)
248013	.070 x 0.50 (1.78 x 12.7)	AR5252/AF5252	8 (2.44)	20 (508)
248014	.042 x 1.0 (1.06 x 25.4)	AR2020/AF2929	15 (4.57)	10 (254)
248015	.052 x 1.0 (1.32 x 25.4)	AR2929/AF2929	12 (3.66)	8 (203)
248016	.060 x 1.0 (1.52 x 25.4)	AR4242/AF4242	12 (3.66)	8 (203)
248017	.070 x 1.0 (1.78 x 25.4)	AR5252/AF5252	8 (2.44)	8 (203)

\* Measured with less than 8 in. (203 mm) drop in stream center at 1200 psi (8.4 MPa, 84 bar) static pressure.

## Extension Tip Seal Kits

Kits include 5 seals.

Kit Part No.	Description
248018	Flat Extension Tip Seal Kit
248019	Round Extension Tip Seal Kit

## Extension Tip Air Cap Kit

### 248020

Includes air cap for use with extension tip kits 248010-248017.

## Flat Pattern Stud Wall Kit

### 249421

To spray high-flow, flat patterns. For use with flat mix chambers only: AF2929, AF4242, AF5252. Includes adapter parts and cleanout tool.

- Flat pattern mix chamber not included. Order separately.
- Optional tip FTM762 available for lower flow and smaller pattern application.

## Hose Adapter Kits

### 246944

To connect non-Graco gun to Graco heated hose.

### 248029

To connect Graco Fusion gun to non-Graco D-gun hose set.

### 246945

To connect Graco Fusion gun to non-Graco heated hose.

## Spatter Conversion Kit

**248414**

To convert Fusion air purge gun to spray, round pattern only, large droplet, low overspray applications. Includes air cap, tip, retainer, seal, and cleanout drill bits.

## Pour Nozzle Kit

**248528**

To convert air purge gun for pour applications. Includes nozzle, seals, tubing, and cleanout drill bits.

## Gun Cover

**244914 Covers**

Keeps gun clean while spraying. Pack of 10.

## Lubricant for Gun Rebuild

**248279, 4 oz (113 gram) [10]**

High adhesion, water resistant, lithium-based lubricant. MSDS sheet available at [www.graco.com](http://www.graco.com).

## Grease Cartridge for Gun Shutdown

**248280 Cartridge, 3 oz [10]**

Specially formulated low viscosity grease flows easily through gun passages, to prevent 2 component curing and keep fluid passages clean. See page 14.

## Flushing Manifold

**15B817 Manifold Block**

See ref. no. 52, page 34.

## Solvent Flush Canister Kit

**248139, 1 qt (0.95 liter) Solvent Cup**

Complete with 15B817 Flushing Manifold to flush gun with solvent. Portable for remote flushing. See manual 309963.

T14165a

## Solvent Flush Pail Kit

**248229 5.0 gal. (19 liter) Pail**

Includes flush manifold with individual A and B shutoff valves, and air regulator. See manual 309963.

T14211b

## Tip Cleanout Tool

**15D234**

Designed to fit CeramTip internal dome and flat tip slits.

## Gun Cleaning Kit

**15D546**

Kit includes 11 tools and brushes to clean the gun.

## Circulation Manifold

**246362**

Attach to gun fluid manifold to enable preheating of hose. See manual 309818.

# Technical Data

Category	Data
Maximum Fluid Working Pressure	3500 psi (24.5 MPa, 245 bar)
Minimum Air Inlet Pressure	80 psi (0.56 MPa, 5.6 bar)
Maximum Air Inlet Pressure	130 psi (0.9 MPa, 9 bar)
Air Flow Range	See chart below
Typical Flow Rate of Round Pattern Guns	See chart page 3.
Typical Flow Rate of Flat Pattern Guns	See chart page 6.
Maximum Fluid Temperature	200° F (94° C)
Air Inlet Size	1/4 npt Quick Disconnect Nipple
A Component (ISO) Inlet Size	-5 JIC; 1/2-20 UNF
B Component (Resin) Inlet Size	-6 JIC; 9/16-18 UNF
Sound Pressure	81.1 dB(A), using AR5252 at 100 psi (0.7 MPa, 7 bar)
Sound Power, measured per ISO 9416-2	91.0 dB(A), using AR5252 at 100 psi (0.7 MPa, 7 bar)
Dimensions	7.5 x 8.1 x 3.3 in. (191 x 206 x 84 mm)
Weight	2.5 lb (1.1 kg)
Wetted Parts	Aluminum, stainless steel, carbon steel, carbide, chemically resistant o-rings

All other brand names or marks are used for identification purposes and are trademarks of their respective owners.

## Air Flow Data in scfm (m<sup>3</sup>/min)

Air Pressure (detriggered) psi (MPa, bar)	Mix Chamber Sizes							
	AR2020	AR2929	AR3737	AR4242	AR5252	AR6060	AR7070	AR8686
80 (0.56, 5.6)	0.8 (.022)	1.4 (.039)	2.0 (.056)	2.6 (.073)	3.7 (0.104)	4.6 (0.129)	5.7 (0.160)	7.1 (0.200)

# Graco Standard Warranty

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

**THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.**

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

**GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO.** These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

## **FOR GRACO CANADA CUSTOMERS**

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
